

## A portable recording unit for official proceedings

DigiTake ReCall is a portable unit that can create a full and complete record of your proceedings on-site. The self-contained unit allows users to record, create annotation and store all the details of the proceedings without the need for computer expertise or sound engineering knowledge.

## Benefits

**Simple To Use:** DigiTake ReCall is designed for immediate operation and is easy to use and operate.

**Cost Effective:** DigiTake ReCall is a portable self-contained unit that requires no extra investment in hardware/software.

**Immediate Record of Proceedings:** DigiTake ReCall creates complete and fully accurate records of proceedings that can be accessed immediately after the proceedings have ended.

**Reduces Overheads:** Create a complete record of your hearing at a fraction of the cost and time required to generate a transcript. DigiTake ReCall allows you

to listen to back to the recording in your own time and select only the areas of the proceedings you deem necessary to be transcribed. This allows you to cut the cost of hiring a stenographer for the entire duration of the hearing.

**CD-ROM:** DigiTake ReCall allows users to burn proceedings to CD-ROM for distribution to the relevant parties or for archiving purposes.

**Superior Sound Quality:** DigiTake ReCall uses digital recording technology to record proceedings thus offering superior sound quality to cassette-based recording.

## Features:

**Content Labeling:** DigiTake ReCall enables users to create text entries as the proceedings take place such as speaker's names or topics raised.

**Automatic Time Stamping:** All notes generated are automatically time-stamped. This feature enables users to click on any line of annotation created and the associated audio will play. This facility allows users to click on a speaker's name to hear their individual contribution as opposed to having

to spool through tapes or read through an entire report to pinpoint just one speaker's contributions.

## Optional Features:

**Footswitch for Transcription:** An optional footswitch is available for use with DigiTake ReCall for transcription purposes. It allows users to navigate through the sound file during playback via the foot-pedal.

## DigiTake ReCall Overview:

DigiTake ReCall contains the complete solution to recording meetings, hearings or any official proceedings in a self-contained portable unit. DigiTake ReCall enables any organisation to record, annotate, playback and store proceedings in a cost effective and easy manner.

Designed with an easy-to-navigate, touch-screen interface users do not require specialised sound engineering or technical computer knowledge to operate.

DigiTake ReCall offers the facility to create a full record of proceedings that can be burned to CD-ROM, uploaded to your in-house network or uploaded to the Internet for distribution to other relevant parties. Up to 20 hours of recordings can be saved on a single CD-ROM disc.

DigiTake ReCall is a flexible system that can be easily modified to suit each individual situation.

## About DigiTake:

DigiTake have been providing professional services, audio equipment and recording software since 1976, serving such clients as the Irish Parliament, the Royal College of Surgeons and the Chartered Institute of Personnel Development.

DigiTake specialise in providing unique and cost effective ways of creating full and complete recordings of meetings, events or proceedings of any kind.

We have unrivalled experience in supplying technical equipment used by the recording media. Over the past 28 years DigiTake have earned a deserved reputation for quality workmanship and reliability.

DigiTake offer a series of recording solutions ranging from customer install software packages, portable recording units to complete in-house installations of customised recording systems.
